

## Getting to the Metcalf Science Center and Life Science and Engineering Building

The Boston University Chemistry Department's offices are split between two buildings: the Life Science and Engineering Building (LSEB - 24 Cummington Street, Building 50) and the Metcalf Science Center (SCI - 590 Commonwealth Avenue, Building 38). The buildings are a very short distance from each other and are located within easy walking distance of Kenmore Square. The closest MBTA stop is **Blandford Street**, the first outbound stop after Kenmore on the Green Line's B (Boston College) trolley.

In order to get to Warren Towers garage (28) from Kenmore Square, you will need to head west on Comm Ave. Continue on Comm Ave for about ½ mile (past Deerfield, and then Sherborn St. which will be on your right). When approaching Granby St. (on your right) make a U-turn so that you are then headed east on Comm Ave. Warren Towers is located on Hinsdale St., which will be on your right just a couple of blocks farther east on Comm Ave.

For a full map, and additional directions, please refer to <http://www.bu.edu/visit/about/introduction.html>.
